

Diksha Grover

Full Stack Developer

Noida, Uttar Pradesh, India | 8950184456 | thedikshagrover@gmail.com | Immediate Joiner

Portfolio: <https://www.dikshagrover.in/> | LinkedIn: <https://www.linkedin.com/in/diksha-grover-9b4342192>

PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building scalable web applications and backend services across the stack using Python, JavaScript, TypeScript, React, and PostgreSQL. Skilled in designing REST APIs, responsive front-end interfaces, and cloud deployments on AWS and Azure, with strong expertise in performance optimization, CI/CD, and delivering end-to-end features across finance, healthcare, and logistics domains.

SKILLS

Programming Languages: JavaScript · TypeScript · Python · SQL

Frontend Development: React · Next.js · Redux Toolkit · RTK Query · HTML5 · CSS3

Backend Development: FastAPI · Django · Flask · REST APIs · Microservices · Kafka · Authentication

Databases: PostgreSQL · MySQL · Redis

Cloud & DevOps: AWS · Azure · Docker · CI/CD Pipelines · Git

Testing & Dev Tools: Pytest · Unit Testing · GitHub · Jira

PROFESSIONAL EXPERIENCE

Consultant - Full Stack Developer

Topsoe | Noida, India | Oct 2025 - Sep 2026

- Built Python REST APIs and Django backend services powering internal web platforms (Topsearch, Clearview), integrating with front-end reporting interfaces.
- Optimized PostgreSQL queries and API response times, reducing latency by 40% and improving dashboard performance by 45%.
- Automated build, test, and deployment through CI/CD pipelines, cutting release cycle time by 30%.
- Deployed and monitored cloud-hosted services on Azure, sustaining 99.9% uptime through proactive troubleshooting and performance tuning.
- Led peer code reviews and defined documentation and coding standards, mentoring engineers on modular design and secure practices.

Tech Stack: Python, FastAPI, Django, Kafka, TypeScript, REST APIs, PostgreSQL, CI/CD, Azure, Docker, Git

Sr. Engineering Analyst - Full Stack Developer

Qualtech | Noida, India | May 2024 - Mar 2025

- Built core backend services and REST APIs for MyMoneyMantra, a leading fintech lending marketplace in the banking domain, powering loan and credit-card discovery for 1M+ monthly users.
- Developed FastAPI microservices for eligibility checks, KYC-driven onboarding, lead routing, and partner-bank integrations across multiple lending and credit products.
- Built responsive React front-end journeys and dashboards surfacing real-time lending and application data, reducing manual handoffs by 60%.
- Implemented caching, partitioning, and archival strategies for high-volume financial data, cutting report runtimes by 40% and reducing production defects by 35% via Pytest-based validation and secure, compliance-aligned data handling.
- Owned end-to-end feature delivery and drove Agile sprint execution, mentoring 3 junior engineers through code reviews.

Tech Stack: Python, FastAPI, Django, Kafka, React, REST APIs, SQL, PostgreSQL, Pytest, AWS, Git

Software Engineer - Full Stack Developer

MTAP Technologies | Gurugram, India | Jan 2023 - May 2024

- Built end-to-end features for Autologix SaaS booking, fleet operations, dispatching, and tracking using Python, React, and PostgreSQL for 500+ daily transactions.
- Developed responsive front-end interfaces in JavaScript/React and modular backend services connected through REST APIs.
- Streamed real-time vehicle tracking and dispatch events through Kafka, enabling low-latency updates across fleet operations modules.
- Designed normalized database schemas and API integrations that unified operations modules, improving reporting turnaround by 30%.
- Containerized services with Docker and wired CI/CD pipelines into AWS, reducing deployment errors by 25%.

Tech Stack: Python, FastAPI, Django, Kafka, JavaScript, React, REST APIs, PostgreSQL, Docker, AWS, Git

Software Engineer - Full Stack Developer

Crownstack | Remote | Oct 2021 - Jan 2023

- Delivered full-stack features using Python, JavaScript, React, REST APIs, and SQL for healthcare product engineering and digital transformation initiatives.
- Built reusable front-end components and backend modules with database integrations across MySQL and NoSQL stores, supporting 4+ product teams.
- Optimized queries, API flows, and UI rendering, reducing average response and load times by 30%.
- Hardened authentication flows and documented deployment runbooks, cutting incident resolution time by 20%.

Tech Stack: Python, FastAPI, Django, Kafka, JavaScript, React, REST APIs, SQL, MySQL, Git, AWS

PROJECTS

PEC - Performance Evaluation Calculation

Engineered full-stack workflows and Django REST backends for a catalyst performance evaluation system at Topsoe, with front-end views for calculating and reviewing catalyst performance across ammonia and chemical process use cases.

Tech: Python, Django, React, PostgreSQL, REST APIs, Azure, CI/CD

MyMoneyMantra Lending Platform

Delivered full-stack modules for a banking and fintech lending marketplace spanning retail lending, asset management, and investment banking, powering loan and credit-card discovery, eligibility checks, and KYC-driven onboarding. Built FastAPI backends and partner-bank integrations behind responsive React customer journeys, serving 1M+ monthly users with secure, high-volume data flows.

Tech: Python, FastAPI, React, SQL, PostgreSQL, AWS

Autologix Fleet Operations Platform

Built a full-stack logistics fleet operations platform with a React front-end and Python/PostgreSQL backend for booking, dispatching, and tracking across 6 modules, using Kafka event streaming for real-time vehicle tracking and dispatch updates.

Tech: Python, React, PostgreSQL, Kafka, REST APIs, Docker, AWS

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science

PRMCEAM, Maharashtra | 2016 - 2020

- Focused on software engineering, web technologies, and database fundamentals
- Built capstone projects around full-stack web applications
